Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

A "•" symbol indicates that the place is also a MCD; the false MCD number is shown in parentheses.

2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. Tribal census tract boundaries are defined by the Bureau of Indian Affairs within a federally recognized American Indian reservation or off-reservation trust land. Tribal census tract boundaries are not defined by state and county boundaries, which are defined by the Bureau of Indian Affairs within an American Indian hierarchy rather than by state and county. Where reservations overlap state and county boundaries, tribal census tract boundaries may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

3 A "•" symbol indicates that the block number is repeated elsewhere in the block.
